

00:54 "Global Villages is an example of an Authenticity Community Enterprise." Literally true, but confusing, because while there can be many Authenticity Community Enterprises, this one provides the platform for all the other Authenticity Community Enterprises. Instead: "Global Villages is the Authenticity Enterprise that takes responsibility for the Community Component of the Quiet Enjoyment Infrastructure." Then you don't need to say that it operates in the Community Component. "In" isn't the right word anyway. Really, it **operates** the component.

When you get to showing Osmio's role, say: "Osmio serves as administrative capital for all provinces and jurisdictions that include the various Villages." Otherwise the relationship between Osmio and a Village is unclear.

Replace "Real Community" with "Physical Community". Using the word "real" implies that we don't think our online communities are real.
